

Ops Deep Dive: Private Flights to the US

Rick Gardner
6 March, 2023

Private flights to the US... **you probably know the basics already:** maybe get a TSA Waiver, file your APIS, contact CBP to get your Permission to Land, and if you're coming from the south make sure you land at one of the Designated Airports (or else get a Border Overflight Exemption).

But after many years of working with US Customs and Border Protection (CBP) to collaborate on General Aviation issues – here's a bit of a deeper dive into some of **the most common topics and gotchas that private aircraft operators to the US should be aware of...**

Arriving from the South

CBP differentiates between aircraft arriving from places "south" of the US versus other countries. Basically, every country in the Western Hemisphere, with the exception of Canada and Bermuda, is considered "south"!

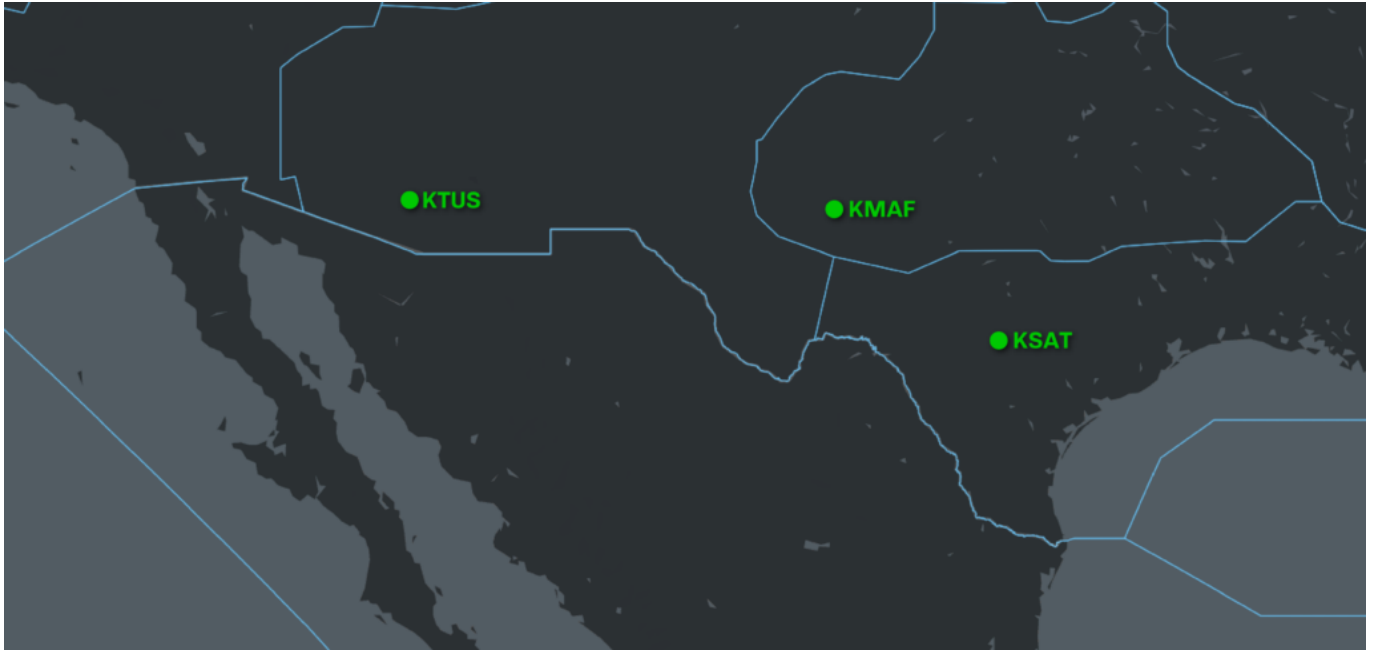

When arriving from one of these countries "south" of the US **we must make our first landing at a CBP "Designated" airport closest to our point of border or coastline crossing** – unless we have obtained a Border Overflight Exemption (BOE). (More on BOEs in a moment.)

There is a specific list of 32 "Designated" southern airports of entry in the regulations (actually, there are only 31, because KNEW/New Orleans Lakefront is no longer a Designated airport), and that not all CBP airports in Florida or along the Gulf of Mexico coastline nor the US-Mexico border are "Designated" airports. Again, we must make our first landing at the Designated Airport closest to where we cross the US-Mexico border or the US coastline.

However, there are a few exceptions:

KTUS/Tucson, KSAT/San Antonio, KMAF/Midland

While these airports are Designated Airports, you cannot get to them without overflying another Designated airport. Nonetheless, if you are granted Permission to Land, you may use these airports as your closest airport to the border.

KMTH/Marathon

While not on the list of Designated Airports, KMTH/Marathon is a CBP port and can be used in lieu of a Designated Airport. Be sure to contact CBP at the airport to obtain Permission to Land. (More on Permission to Land in a moment.)

Miami Field Office Airports

So we're talking about 8 airports here: KEYW/Key West, KTMB/Miami Executive, KMIA/Miami International, KOPF/Opa Locka, KFXE/Fort Lauderdale Executive, KFLL/Fort Lauderdale International, KPBI/Palm Beach, KFPR/Fort Pierce.

The CBP Miami Field Office (MFO) has established that "Flights which are required to land at a nearest designated airport to the border or coastline crossing point **may proceed directly to any of the eight designated airports... without an overflight exemption**, even if the airport of intended landing is not the one closest to the US coastline crossing point."

So, if you were returning to the US from Cancun, Mexico, you could overfly Key West and continue up the east Florida coastline all the way to Fort Pierce and you would be in compliance. **What you cannot do when returning from The Bahamas is to overfly any of these MFO airports and land in KTPA/Tampa** even though Tampa is one of the 32 Designated airports!

Border Overflight Exemptions (BOE)

One way to avoid having to deal with Designated Airports is to obtain a BOE from CBP.

How it works

One of the great things that CBP Headquarters has accomplished is to get rid of the old Forms 442 and 442A and to **centralize the BOE approval process**. In addition, they have eliminated the previous requirements of having to list all aircraft, foreign ports, crew and passengers that would be authorized under the BOE. Today, all you have to do is **identify the operator to whom the BOE will be issued** and any aircraft, crew, passengers and foreign ports are all systematically vetted through APIS when the manifest is transmitted.

Per CBP regulations, BOE's can take **up to 30 days to process**, so don't waste time. For more information regarding the application process, contact GAsupport@cbp.dhs.gov.

Gotchas

A BOE holder has to ensure that the Operator specified in the APIS manifest **MUST** be the Operator to whom the BOE was issued. In addition, to legally use a BOE, the flight must be **under IFR, fly above 12,500 feet and not make any intermediate stops**.

A BOE is obtained by demonstrating **a history of compliance**. If you are subject to an enforcement action, the pilot can lose their BOE privileges for 6 months and repeated violations can result in the Operator losing their BOE privilege also.

Advanced Passenger Information System (APIS)

Since Nov 2008, operators of private flights have been required to file a DEPARTURE APIS manifest using the Electronic Advanced Passenger Information System (eAPIS) portal when departing the US for a foreign country, and an ARRIVAL APIS manifest when returning to the US from a foreign country.

Welcome

The Electronic Advance Passenger Information System, or eAPIS, allows you to enter or upload passenger and crew manifests online. Reports are also available through eAPIS for Customs and Border Protection approved individuals.

How it works

DEPARTURE and ARRIVAL APIS manifests must be filed and authorization from the Department of Homeland Security (DHS) must be received **no later than 1 hour prior to departure** from the US or foreign country. This DHS authorization comes in the form of a receipt email which contains a summary of the date, time, departure and arrival airports.

As there is no limitation on how early an APIS manifest may be submitted, I recommend that you submit it as soon as possible once your itinerary and crew/passenger information is established. CBP always advises, "Transmitting for next week is fine if your plans have firmed up but next Christmas is too far away." Leaving things to the last minute just invites Murphy's law.

You should never be asked to provide Personally Identifiable Information (PII) such as DOB, passport number, SSN, etc. via FAX or email. If you do get such a request, ask for the supervisor, contact CBP headquarters or contact us at +1 786 206 6147.

Gotchas

Double check that the information in the DHS receipt email is accurate! **Failing to get the receipt email from DHS means you have not received authorization to depart so you definitely should not depart.** Sometimes failing to receive a DHS receipt email may be due to issues with the CBP systems or typos in your email address. Check your SPAM folder to make sure that the email was not sent there. If you share the eAPIS account you are using with someone else, check to see if they changed the email address and ask them to forward the authorization to you. **One last resort is to contact CBP** at the port and ask if they can determine if the authorization was issued, write down the officer's name or initials in the event that there is ever a question about whether you received authorization.

The rules also require that if you add/remove/substitute crew and/or passengers or if you make a change to the travel calendar date in either a DEPARTURE or ARRIVAL manifest then you **must resubmit a new manifest to CBP**. Any authorizations related to the originally submitted manifest are no longer valid and

you must wait for a new authorization from DHS. Changes to departure time, arrival time or arrival location may be made by phone.

Arriving in the US

In addition to submitting an ARRIVAL APIS manifest and getting the receipt email from DHS, the regulations specifically require us to also **contact CBP at the arrival airport and obtain Permission to Land** (sometimes referred to as, "Landing Rights").

Recent changes to how it works!

Historically, different CBP ports have implemented varied procedures for requesting and granting Permission to Land, however that is now becoming more standardized through the efforts of CBP headquarters.

One significant change is that CBP will no longer grant Permission to Land unless you have **successfully submitted your APIS ARRIVAL manifest first**. When you are granted Permission to Land by CBP at the arrival port, you should receive an email from CBP (in addition to the one sent by DHS) confirming that Permission to Land has been granted and any specific instructions that CBP may have. If you are denied Permission to Land, you will also receive an email from the port confirming that Permission to Land was denied.

Failing to receive the email confirming Permission to Land is an indication that either the port has **not yet adopted the new procedure** or that Permission to Land was **not properly issued** by the CBP officer who responded to your request and a follow up request would be advisable. Be prepared to prove who gave you permission to land - the receipt email from DHS alone does not grant you Permission to Land.

Check those attachments!

The email granting Permission to Land will have several attachments. The first attachment is called "**CBP Private Aircraft Arrival Information**" which contains an overview of what the operator of a private aircraft is expected to do in order to comply with CBP regulations.

In addition, you may also find attached a "**General Aviation Airport Fact Sheet**" which contains detailed information on what you need to know about the CBP requirements for the specific airport you are landing at. Not only do these two documents clarify what is expected of you, they serve as proof to a CBP officer that you have followed procedures correctly.

Lastly, there is a third document called "**Tip of the month**" which is a review of important topics that pilots should be aware of and this document is updated monthly. Of the 392 airports where CBP is present, approximately 250 have published Airport Fact Sheets.

Changes to your schedule

The Permission to Land email messages grant permission based on what you have transmitted in APIS and also include **port-specific time tolerances**; a +/- time allowance based on port operations. If you need to ARRIVE in the US at a time significantly different from that submitted in your ARRIVAL manifest, you need to contact CBP to re-secure Permission to Land for your new arrival time. Many aircraft land at Designated Airports and CBP must ensure that they have the space and manpower to receive and process inbound aircraft.

When you arrive

When arriving in the US, there is no regulatory basis requiring pilots and travelers to remain onboard an arriving aircraft awaiting formal or direct permission to deplane. **CBP officers at some ports may not come out to meet the aircraft** and may wait inside the building until the crew/PAX come inside. **Other ports may have signs with instructions, follow them**. However, any traveler movement outside the immediate aircraft area or interactions with other individuals, is not permitted without specific and direct CBP authorization. In all cases, especially where health and safety concerns present or exist, CBP always

emphasizes to exercise reasonable and responsible judgement. If your aircraft Auxiliary Power Unit (APU) exhaust is 8 feet or higher above the ground, you do not have to power it down. However, CBP can require you to shut down the APU, though, in cases of enforcement actions.

Departing the US

You do not need to depart the US from an airport where CBP is present – **you can depart from any airport in the US.**

How it works

In your APIS DEPARTURE manifest you should **enter the airport code of the nearest CBP airport** to the departure site and then in the “Actual Departure Location Description” field, describe the actual place from which the aircraft will depart. This is an optional field which should be used only when the location of actual departure differs from the airport listed in the “CBP Airport” field. The “City” field should be the actual city from which the aircraft is departing.

When you submit an APIS DEPARTURE manifest to CBP and you receive DHS authorization to depart, the authorization is based on the information that you have submitted, including the departure time.

Spot checks!

On occasion, CBP conducts random departure inspections on aircraft departing from the US (it has happened to me) and officers will be dispatched to your departure airport location. If they arrive and you have departed before the time you specified or if you are nowhere to be found and then depart after the time specified, you could be subject to enforcement action. **Always update departure times with CBP!**

Canceling or postponing a flight

You are required to advise CBP if you are going to cancel your flight or postpone it to another date (which will require that you file a new manifest). This is important because CBP plans their workload and staffing based on manifests that they can see in the system.

How it works

Under CBP’s updated procedures, when you cancel an APIS manifest, you will also receive an email confirming that your APIS manifest has been canceled. **If you transmitted multiple APIS manifests for the same date, the CBP port may cancel the unnecessary manifests which can trigger an email saying that the “APIS was cancelled”.** Remember that each submitted APIS manifest has a unique eAPIS number as does the DHS receipt email and CBP cancellation email so you can match them. If you are ever in doubt, you should contact the port to confirm.

Transporting currency

Another important point is that you must always report if you are taking into, or out of, a country **more than \$10,000 USD**. It is not illegal to transport more than that amount, but failing to report it is illegal.

The nitty gritty

When you transport, attempt to transport, or cause to be transported (including by mail or other means) currency or other “monetary instruments” in an aggregate amount exceeding \$10,000 or its foreign equivalent) at one time from the US to any foreign country, or into the US from any foreign country, **you must file a report with US Customs and Border Protection.** This report is called the Report of International Transportation of Currency or Monetary Instruments, FinCEN Form 105. This form can be obtained at all U.S. ports of entry and departure or on the Web at FinCEN Form 105 (Rev. 7-2003).

Alternatively, the report can be filed electronically, an eCMIR, at this website. Travelers will be able to enter information into an eCMIR up to three days prior to travel, creating a provisional document on the CBP.gov website. Foreign countries will also have their own documents and procedures. Failing to report

can result in seizure of the monetary instruments, fines, or worse.

CBP officer says it's OK

One topic that comes up repeatedly is that a CBP officer "Buddy" says its OK to land without a BOE or approves some other deviation from the rules.

Don't do it!

CBP headquarters has made it very clear that no CBP officer has the authority to override US law. Doing so could get both you and the officer into trouble. **Don't succumb to the temptation of listening to what you want to hear versus what you need to know!** Enforcement actions can cost you money, ruin your reputation with CBP and cause you to lose BOE privileges.

Visa Waiver / ESTA

Part of the joy of having a private aircraft is to share the experience with family and friends...

Visa Waiver gotcha

If any of those are citizens of Visa Waiver countries and they do not have a US Visa, then **they cannot fly into the US on a private aircraft unless you are a signatory carrier** or under some very isolated and specific circumstances. Contact CBP before you attempt to do so to avoid unpleasant surprises. If there is any chance that you may transport citizens from Visa Waiver countries, submit your request to become a signatory carrier now, while there is time.

PIC Responsibility

Yep, you know this already. **As PIC you are ultimately responsible for compliance with all the regs.** In the case of CBP, the PIC is responsible for ensuring that valid passports are brought aboard the aircraft that match the APIS manifest information submitted to CBP and that authorizations to depart are properly received.

Getting it wrong

If you ever do face an enforcement action, **best to just be honest.** CBP is not out to get us, what they want is compliance and have repeatedly demonstrated a willingness to work with General Aviation to achieve it. Work with them and they will work with you. This is not a guarantee that CBP will not take enforcement action, those determinations are made on a case-by-case basis and much depends on the nature and circumstances of the violation as well as the way you handle it. **Violations are usually the result of either an oversight or wilful intent** - you don't want to give CBP the reason to believe that you are part of the latter if that isn't the case!

Illegal Charters

Unless you have a burning desire to find out more about both the US and foreign legal systems, **do not misrepresent yourself** as a private aircraft flight when in fact you are operating as a commercial aircraft operator!

Understanding the Regs

CBP defines a "commercial aircraft" as "any aircraft transporting passengers and/or cargo for some payment or other consideration, including money or services rendered" as per 19 CFR 122.1 (d). Note that CBP's definition of private and commercial are different from those used by the FAA.

Some US pilots believe that US regs apply to them when flying internationally, but 14 CFR 91.703 (a) (2) clearly states that they must abide by the laws of the foreign countries where they operate. Many of these countries also have much more basic definitions of commercial and non-commercial operations.

Bottom line – **don't try to walk a fine line with Part 91 definitions** as this could land you in hot water with the CBP as well as with the civil aviation authorities of foreign countries.

Puerto Rico and US Virgin Islands

Time for some bulletpoints, all *nice*ly colour-coded...

- Flights between the continental **US** and **Puerto Rico** are considered domestic flights as long as the flight is conducted under IFR, the flight is above 12,500 feet and there are no intermediate stops.
- Flights from **Puerto Rico** to the **US** require a US Department of Agriculture (USDA) inspection in **Puerto Rico** prior to departure.
- Flights from the **US** and **Puerto Rico** to the **US Virgin Islands** are considered domestic flights BUT flights from the **US Virgin Islands** to the **US** and **Puerto Rico** are treated as international flights.
- When departing the **US Virgin Islands** to the **US**, always go through the pre-clearance process with CBP in the **US Virgin Islands** before departing. APIS must be transmitted as an ARRIVAL into the **US**.

Other Gotchas!

Check those pesky passports again

The PIC should verify that the doc that were used for the submission of the APIS manifest are on board the aircraft. **This can maybe be a bit awkward, but it is the PIC's reputation with CBP** and a possible enforcement action and loss of BOE privileges that are at stake. Some of the more common issues that arise are:

- Missing passport, the passenger forgot to bring it
- Bringing a different passport form the one use in the APIS manifest, passenger has 2 passports
- Bringing spouse's or child's passport by mistake
- Bringing a passport card instead of a passport, passport cards are not valid for use on an aircraft

Remember, an APIS manifest needs to contain verified and accurate information, the PIC must validate that what they have submitted is correct. CBP has told us repeatedly that **transmitting bad data is always grounds for enforcement action.**

Guns

Another common gotcha is trying to reenter the US with firearms after a hunting trip. You should present firearms to CBP along with CBP Form 4457 before leaving the US.

Diamonds are a girl's CBP officer's best friend

Same as above! Any high value item such as camera/video equipment, jewelery, etc need to be declared to CBP before leaving the US.

Anything we missed?

If you have questions about any of the above, or if you think there's a big thing we missed, let us know!

About the author:

CST Flight Services provides a wide range of international trip support services for both owner-pilots and professional pilots. CST is also the representative for the Aircraft Owners and Pilots Association (AOPA) in Mexico, Central America, The Bahamas and the Caribbean as well as a Bahamas Flying Ambassador, member of The Bahamas Civil Aviation Council and has participated on aviation committees of other foreign countries.

Are you some kind of flight ops expert with knowledge to share?

Know something worth knowing about something, and want to write about it? Maybe a big thing (ops on the North Atlantic), a medium-sized thing (how to get an Australia TSP), or just a weird thing that you think other pilots and operators would like to know about? Let OPSGROUP know! Maybe we can work together and write an article on it.
